

Breakdown Response Checklist

A quick-reference checklist used by our engineers for every 24/7 breakdowns engagement. Print and bring to site, or share with your facilities team.

- Confirm trapped passengers — prioritise dispatch
- Log fault code and last-known floor position
- Verify mains power and isolator status
- Inspect door zones and safety circuit
- Test brake release and manual lowering procedure
- Photograph damaged components for parts order
- Issue temporary out-of-service signage if required
- Email written incident report within 24 hours

Questions? Email service@angellifts.co.uk — a senior engineer will respond the same working day.
